

# Capertee Valley bird trail

## Before you set off ...

Part of the valley's charm is its comparative isolation. There are no cafés, no petrol stations, and, depending on your service provider and location, there may be no mobile phone coverage.

All 19 bird-watching sites shown on this map are easily accessible. A small section of the route is unsealed but suitable for 2WD vehicles. After rain you may need a 4WD vehicle to visit Site 8.

If you wish to enter Capertee National Park (Site 14) call NPWS Blackheath office (02 4787 8877) for the padlock access code.

## Please take care

- Gravel roads may be slippery when wet.
- Look out for cattle and wildlife.
- Park off the road.
- Don't park across gates.
- Don't stand in the middle of bridges and roads.
- Don't enter private property unless you have the owner's permission.
- Remove your own rubbish: take it with you.
- Please don't use playback, it can disrupt breeding.

## National Trail

The Australian Bicentennial National Trail (BNT) is a 5,330-km self-reliant multi-use route through bush, wilderness and mountain areas:
